

Scientific Discovery

Hello. I am Dr. McCord the inventor of Olivamine, **the foundation of all** Pinnaclife products.

Everyday we read about amazing medical advancements that are on the horizon, but unavailable for ten years while they are being tested and developed. We often hope to experience the benefits of these advanced treatments and “cures” when we need them. The Olivamine products have been decades in the making and they bring the promise of skin and wound treatment that was not imaginable just ten years ago.

Olivamine is a culmination of some of the greatest advancements in science. Each ingredient’s biochemical efficacy is evaluated through extensive research of published independent peer-reviewed literature. Our quest for excellence has led us to seek ingredients that meet all United States Pharmacopeia (USP) or National Formulary (NF) standards for quality and purity.

We **select** purified **molecules** from medically validated plant sources. All molecules found in Olivamine products originated from the **highest quality** farms from around the world. Olivamine marries the best of molecular science with the **best phytochemical** science.

The scientific journey has been long but the results of our efforts brought us to the most important discovery of all, Olivamine.

Olivamine heals when nothing else can.
